

Tsukiji District Community Development Project — Overview Fact Sheet —

Bureau of Urban Development, Tokyo Metropolitan Government

Tsukiji Community Development

Once home to beautiful rows of samurai residences during the Edo period, since the Meiji era (1868-1912), the Tsukiji district became the site of a foreign settlement, where Japan's first institution of higher education for women, a full-fledged hotel, and a hospital were established. This district was later utilized as the site of the wholesale market. Then, with the opening of Toyosu Market in 2018, a large tract of open area was created at the site of the former Tsukiji Market.

As to the community development of the Tsukiji district, the Tokyo Metropolitan Government (TMG) asked experts to discuss a wide range of issues, including food culture, and to propose ideas on further enhancing Tsukiji's value. Their report, "A Broad Perspective on Tsukiji District Community Development" was submitted in 2018.

Based on this proposal, and input from Tokyo residents, the TMG formulated the "Tsukiji District Community Development Policy" in 2019. In November 2022, TMG began soliciting applicants to carry out the community development project, and in November 2024 selected the Prospective Operator.

TMG will henceforth hold discussions with the Operator and others to brush up the plans proposed by the Operator and promote urban development that will lead to the sustainable growth of Tokyo.

Background of the Tsukiji District Community Development Project

The Tsukiji District Community Development Project was formulated in 2019, based on the opinions of experts and Tokyo residents. In 2022, TMG began soliciting applicants to carry out the project, and selected the Prospective Operator in April 2024.

Sep. 2017	The "Tsukiji Redevelopment Study Council" was established to make the most of Tsukiji's appeal by gathering ideas from experts in diverse fields, thus establishing a broad perspective for the project.
May 2018	At the Tsukiji Redevelopment Council, "A Broad Perspective on Tsukiji District Community Development"* was proposed to TMG. **"A Broad Perspective on Tsukiji District Community Development" set out the basic direction for creating a hub for people to gather and communicate, and to transmit Tokyo's attractions to the world.
July 2018	TMG established the "Tsukiji District Community Development Study Committee" to consider the draft of the "Tsukiji District Community Development Policy (tentative name)."
Oct. 2018	With the opening of Toyosu Market, a large tract of open area was created on the former site of Tsukiji Market.
Jan. 2019	TMG released the "Tsukiji District Community Development Policy (Draft)" and made requests for public comment.
Mar. 2019	TMG formulated the "Tsukiji District Community Development Policy"* outlining a future vision, the direction and process for implementing the redevelopment of the Tsukiji district. * "Tsukiji District Community Development Policy" describes the introduction of interactive facilities, including a conference hall with exhibition spaces and large-scale visitor attractions, forming the core of an area that will attract visitors from home and abroad, promote exchanges, and create a vibrant environment.
Sep. 2020	"The Direction of Soliciting Prospective Operators for the Tsukiji District Community Development Project" was released. TMG decided to consider the project implementation policy with regard to recruiting prospective operators for both the preliminary and full-scale development of the project, in an integrated manner.
Mar. 2022	TMG released the "Implementation Policy of the Tsukiji District Community Development Project," describing specific conditions for recruiting prospective operators.
Nov. 2022	TMG released the "Application Guides for Operators for the Tsukiji District Community Development Project, which show the procedures for recruiting prospective operators, contract conditions, etc. Call for applicants began.
Aug. 2023	TMG began accepting proposals from applicants.
Apr. 2024	TMG selected the Prospective Operator and made it public.

The Aim of the Tsukiji District Community Development Project

The Aim of the Project

Forming a hub for creating and sharing new culture through interaction

The Tsukiji area is full of potential, with places like Hama-rikyu Gardens, which were once called “Hama Goten (or Palace),” the Sumida River, which has many famous Edo-period landmarks, and Tsukiji Outer Market, which draws visitors to its culinary attractions.

The idea behind the Tsukiji District Community Development Project is to promote urban development that will lead to sustainable growth for Tokyo and Japan. This will be achieved by utilizing the potential of this vast area in central Tokyo, surrounded by water and greenery, and its historical and cultural resources, while linking the city center with the waterfront and making the best possible use of the private sector. On the basis of such an idea, the project concept has been established as written below.

Project Concept

“A Hub with Abundant Water and Greenery for Creating and Promoting New Culture through Diverse Exchanges with People from around the World.”

Approaches to realize the project concept (see the previous page)

① To create a landscape that symbolizes Tokyo's waterfront

- To design symbolic and impressive landscapes that represent the characteristics of Tokyo as a Water City, with a view to welcoming people through the waterway routes.

② To welcome visitors from around the world with the charm that Tokyo can offer through its rich environment and history unique to the city

- To create venues to welcome people in many ways by taking advantage of the multiple accessibility via land, the Tokyo Bay, and Sumida River.
- To develop a pleasant district that invites people to explore by making the best use of the waterside areas and enriching greenery, while providing enough space where people can enjoy themselves and socialize.
- The district should be an area where, by creating a space with attractive and appealing design, people can discover the charm of Tokyo that embraces both tradition and cutting-edge technology.

③ To offer an open space for creating new cultures through diverse exchanges

- To develop highly accommodating venues by introducing features including high-capacity facilities and outdoor plazas accessible to a diverse range of people, stimulating interactions and allowing them to proactively promote diverse activities, thereby creating new cultures.

From the perspective of promoting urban development that will lead to Tokyo's sustainable growth, the Operator shall effectively work on the following four initiatives in bringing the Project in shape:

- **Realizing zero emissions and using domestically sourced timber**
- **Utilizing digital and innovative technologies**
- **Embedding the prevention and mitigation of infectious diseases, that may emerge in the future, in the improvement and management of facilities**
- **Promoting community development from the perspective of children and childcare**

The Objective of the Project

Formation of a wide-area transportation hub

Around the Tsukiji district and its neighboring area, new infrastructures are being considered, such as a Future Subway Network in Central Tokyo and Waterfront Area Subway Line, as well as the Urban Expressway Route No.10 Harumi Line. Additionally, in conjunction with community development following the relocation of the Tsukiji Market, construction of the Tsukiji Disaster Prevention Pier, renovation of the pedestrian network on the Tsukiji-Takeshiba Seawall, the Sumida River Super Levee Development Project, and the Tsukiji River Seawall Project are also being planned.

The Tsukiji District Community Development Project will work in tandem with these infrastructure projects to ensure smooth community development, while creating a wide-area transportation hub with infrastructure such as boats, buses and subways through the initiatives listed below.

Initiatives to be taken under the Project

- **Develop traffic plazas that connect new subway stations, buses, and boat transportation (boat landings) in the city center and waterfront areas.**
- **Secure access to the Urban Expressway Route No. 10 Harumi Line.**
- **Make use of the Tsukiji Disaster Prevention Pier to make it a vital part of Tokyo's water transport network.**
- **Develop facilities such as waiting areas which will contribute to building momentum for and improving the convenience of the water transportation networks.**
- **Develop a pedestrian network for enjoyable walks, including pedestrian decks that connect both sides of Loop Road 2 to enhance integration and ease of access.**

(Reference) The image of infrastructures near our Tsukiji development

The below infrastructure is being considered:

➤ New Central Tokyo and Waterfront Area Subway Line

Within the building restriction zone of our project area(see the map) ,the main subway line and a new station are planned for construction.

For details, see the Bureau of Urban Development's website

(https://www.toshiseibi.metro.tokyo.lg.jp/bunyabetsu/kotsu_bu_tsuryu/kentoukai.html)

➤ Urban Expressway Route No.10 Harumi Line

Within the building restriction zone of our project area (see the map), the main line and other facilities are planned. For details, see the Bureau of Urban Development's website

(https://www.toshiseibi.metro.tokyo.lg.jp/bunyabetsu/kotsu_bu_tsuryu/kosoku_shinkyobashi.html)

➤ Development Plan for Tsukiji Disaster Prevention Pier

Construction of a disaster prevention pier (see the map) is planned in the vicinity (the lower reach) of the Kachidoki Bridge. For details, see the Bureau of Urban Development's website

(https://www.kensetsu.metro.tokyo.lg.jp/jigyo/river/bousaifuna_tsukiba/index_bousaihunatukiba.html)

This map has been approved by the head of the Geospatial Information Authority of Japan (public announcement 2012, No. 269) and drafted using the topographical map of Tokyo (S=2,500) (3 Toshikiko No. 983). Additionally, this map utilizes the road network map ((approval no.)3 Toshikigai Tokyo No. 227, March 3, 2022). Copying without approval is prohibited.

* The above positions and figures are estimates for representative purposes

(Reference) Outline of Application Guide for the Operator

<p>(1) Location of the Project</p>	<p>Areas within Tsukiji 5-chome and Tsukiji 6-chome, Chuo-ku, Tokyo Area of Metropolitan Government-owned land for use: 194,679.11 m² *</p> <p>*Expected area to be leased, excluding future public facility-usage land, will be approximately 18.7ha</p>
<p>(2) Project Outline</p>	<ul style="list-style-type: none"> ● Concept “A Hub with Abundant Water and Greenery for Creating and Promoting New Culture through Diverse Exchanges with People from Around the World” ● Key Points of the Project (key conditions for development) <ol style="list-style-type: none"> ① Landscape Tokyo to epitomize its waterfront-city characteristics <ul style="list-style-type: none"> • Creation of an attractive landscape, unique to Tsukiji, by utilizing the surrounding historical and cultural landscape resources and waterfront • Design the areas to be an impactful icon symbolizing Tokyo’s waterfront ② Welcome visitors from around the world with the charm that Tokyo can offer through its rich environment and history unique to the city. <ul style="list-style-type: none"> • Develop traffic plazas that connect new subway stations, buses, and boats in the Central Tokyo and Waterfront Area • In order to become an integral part of Tokyo’s water transport network, utilize the disaster prevention boat landing to be developed by TMG • A pedestrian network to be developed in cooperation with TMG, including pedestrian spaces that utilize the waterfront connecting Kachidoki Bridge to Takeshiba and a pedestrian deck that connects both sides of Loop Road No. 2 to enhance integration and ease of access ③ Offer an open stage for creating new cultures through diverse exchanges <ul style="list-style-type: none"> • Adopt functionality to disseminate new culture through the utilization of local resources such as Hamarikyu Gardens and the Sumida River, in addition to historical and cultural assets such as food culture • Together with the creation of new culture, introduce “high-capacity facilities and people-to-people exchange functionality” which will be Tokyo’s strengths in relation to the rest of the world. In addition, introduce “functionality for conferences and events appropriate for an international exchange hub” • Creation of vibrancy, appropriate for the district, while taking into account the vitality and liveliness that Tsukiji has fostered as well as creating synergies with the surrounding areas • To promote effective community development, generate a new vibrancy for the area in advance, before the development of facilities is completed

(Reference) Outline of Application Guide for the Operator

<p>(2) Project Outline</p>	<p>④ Take initiatives to realize a sustainable city Tokyo that balances growth and maturity</p> <ul style="list-style-type: none"> • Realize a zero-emission community which contributes to the promotion of the Tokyo Bay eSG Urban Development Strategy • Maximize the usage of cutting-edge digital technology and technological power well into the future • Promotion of community development from the perspectives of children
<p>(3) Application Outline</p>	<ul style="list-style-type: none"> ▷ Description of the Operator's Business <ul style="list-style-type: none"> • Based on applicant proposals, implements the design, construction, operation, maintenance, etc. of facilities ▷ Method of Selection <ul style="list-style-type: none"> • Selection of Prospective Operator based on the public request for proposals ▷ Lease of TMG-owned Land <ul style="list-style-type: none"> • Lease of TMG-owned land to the Operator under an ordinary fixed-term land lease* Lease Period: A period of 70 years + period of construction, etc. (70 years from the start of operations of water transport, etc. facilities) * Additional land lease to provide for advanced creation of area vibrancy ▷ Regarding response to changes in circumstances in the future and to the most advanced community development <ul style="list-style-type: none"> • Alterations to the plan in response to changes in socioeconomic conditions, etc., shall be accepted on the condition that the concept of the initial proposal is maintained
<p>(4) Project Schedule</p>	<p>After selection of the Prospective Operator, the Basic Agreement is entered into, and community development is started</p> <ul style="list-style-type: none"> * Specifics of the schedule depends on the Operator's proposal • Promptly begin operations to create initial vibrancy • In conjunction with TMG's development of the disaster prevention pier (scheduled for completion in 2029), provide convenient water transport facilities such as waiting areas and others to enhance vibrancy Develop the entire district as early as possible (the whole district to be leased by the first half of the 2030s)

Details Regarding Selection of the Prospective Operator

The recruitment and selection of the Prospective Operator was made on a “Request for Proposals” basis.

A group of private companies willing to join the Project participated in an open recruitment. The “Tsukiji District Community Development Project Selection Committee”, which is made up of outside experts, reviewed received proposals. Based on the results of the committee’s review, TMG selected the Prospective Operator.

[Selection Timeline]

Nov. 30, 2022	The Application Guide for Operator for the “Tsukiji District Community Development Project” was announced publicly.
March 30, 2023	Answers to the questions raised by applicants concerning the Application Guide for Operator for the “Tsukiji District Community Development Project” were made public.
Jun, 2023	Dialog on proposal details was held.
Aug. 31, 2023	Proposals by applicants were submitted.
Apr. 19, 2024	The Prospective Operator was selected.

Selection of the Prospective Operator

Results of the Selection of the Prospective Operator

Based on the review of the results of the Tsukiji District Community Development Project Selection Committee, the Prospective Operator was selected as detailed below.

Prospective Operator	Group Name ONE PARK x ONE TOWN
Members	Mitsui Fudosan Co., Ltd (representative company), Toyota Fudosan CO, Ltd. Yomiuri Shimbun Group Inc., Kajima Corporation, Shimizu Corporation, Taisei Corporation, Takenaka Corporation, Nikken Sekkei Ltd, Pacific Consultants Co., Ltd., The Asahi Shimbun Company, Toyota Motor Corporation

*For the Committee review results and outlines of proposals by the Prospective Operator, please check the following Bureau of Urban Development webpage regarding the “Selection of the Prospective Operator”:
(https://www.toshiseibi.metro.tokyo.lg.jp/bosai/toshi_saisei/data/press24yoteisyakettei01.pdf)

Plans Following the Selection of the Prospective Operator

Plans Following the Selection of the Prospective Operator

How to proceed with the Project from now on and its schedule

- In the light of various opinions expressed by the members of the Selection Committee in the selection of the Prospective Operator, TMG, external experts and the Prospective Operator will hold talks to brush up the plan proposed by the Operator.
- Henceforth, the Basic Agreement, land lease contract, and the contract to set forth fixed-term land lease rights will be concluded, and the parties will work toward the realization of the objective of this project.
- The Basic Agreement that stipulates the community-building plan and development as well as conditions for operations, etc. is scheduled to be concluded within FY2024.

Q&A Regarding Tsukiji District Community Development

Bureau of Urban Development, Tokyo Metropolitan Government

Q1: What is the objective of this Project?

The basic concept of the Tsukiji District Community Development Project is to pursue community development, leading to the sustainable growth of Tokyo and Japan by leveraging the potential advantages of the centrally located large land areas with rich sources of water and greenery, as well as historical and cultural resources. Based on this concept, the Project is to create “A Hub with Abundant Water and Greenery for Creating and Promoting New Culture through Diverse Exchanges with People from around the World.”

Q2: How has TMG listened to and reflected the opinions of residents up until now?

In preparation for the formulation of the “Tsukiji Community Development Policy” which sets forth the future vision, direction, and process of implementing the project for the community development of the Tsukiji District, a policy draft was released for public comments during a period from January 23, 2019, until February 21.

TMG received a total of 202 comments, of which 69 were reflected in the revised draft. In March 2019 we formulated the Tsukiji District Community Development Policy by enhancing the draft to include visions for the future, the current situation regarding land usage, perspectives on the introduction of new functionality, as well as the concepts of how to introduce new functionality.

For more information on the comments received and TMG’s concepts, please see the Urban Development Bureau’s website (https://www.toshiseibi.metro.tokyo.lg.jp/bosai/toshi_saisei/saisei08_06.html)

Q3: Please explain the method of implementing the Project.

For the Project, TMG has issued a public request for proposals (TMG announced the implementation policy, application guidelines, etc., and solicited plan proposals from the private sector) through which the Operator is selected. Upon selection, TMG will establish a fixed-term land lease right on the land owned by TMG and leases it to the Operator.

The length of the fixed-term land lease rights (for the main facilities) is “a period of 70 years [70 years from the start of operations of water transport facilities, etc.] + period of construction, etc.). During this period, the Operator will design, construct, operate, maintain, manage, etc. the facilities based on their proposal.

In addition, the Operator will propose, develop, and operate measures to create vibrancy before the construction of the main facilities.

Q4: What are the roles of the Operator and TMG?

For the Project, TMG will establish the fixed-term land lease rights on metropolitan-owned land that will be used, and lease the land to the Operator. During the lease period, the Operator will design, construct, operate, maintain, and manage the facilities, while paying rent to the landowner (TMG).

For details on the division of roles, please refer to the Urban Development Bureau’s website on “Application Guide for Operator” (https://www.toshiseibi.metro.tokyo.lg.jp/bosai/toshi_saisei/saisei08.html)

Q5: Please provide details on the process of selecting the Operator.

Nov. 2022- Announcement of the Application Guide for Operators

March 2023- Announcement of responses to the questions raised by applicants concerning the Application Guide for the Operator

June 2023- Hold dialog on proposal details

June 2023- Announcement of public information based on the dialog

August 2023- Submission of proposals from applicants

October 2023 - Tsukiji District Community Development Project Selection Committee convenes

December 2023 - Tsukiji District Community Development Project Selection Committee convenes

February 2024 - Tsukiji District Community Development Project Selection Committee convenes

April 2024 - Tsukiji District Community Development Project Selection Committee convenes

April 2024 - Selection of the Prospective Operator, and public announcement

*Regarding the documentation of responses to the questions raised by applicants concerning the Application Guide for the Operator and the announcement of public information based on the dialog, please refer to the Urban Development Bureau's website (https://www.toshiseibi.metro.tokyo.lg.jp/bosai/toshi_saisei/saisei08.html)

*Regarding selection results and outline of the proposal from the Prospective Operator, please refer to the "Selection of Prospective Operator" section of the Urban Development Bureau's website

(https://www.toshiseibi.metro.tokyo.lg.jp/bosai/toshi_saisei/data/press24yoteisyakettei01.pdf)

Q6: What selection process was used to determine the Prospective Operator? Also, what was the overall result of the selection process, including the number of applications, etc.?

With regard to the screening of proposals from applicants, the selection process, criteria, etc. are made available in the “Application Guide for Operator for the Tsukiji District Community Development Project.”

Specifically, the “Tsukiji District Community Development Project Selection Committee”, which consists of nine external experts in the fields of community development, transportation, culture, etc., based on selection criteria, confirms whether applicant group members meet the requirements to be qualified as participants (examination of participation qualifications). They also confirm whether the basic conditions for the proposal are met (eligibility screening of basic matters), and evaluate proposals based on the “examination of business plans,” “screening of rent,” and “overall evaluation,” as well as other factors.

On Aug. 31, 2023, proposals were received from 2 groups, and as a result of the selection process, the best proposal, from ONE PARK x ONE TOWN, was selected.

* With regard to the results of the selection, please refer to the “Selection of the Prospective Operator” section of the Urban Development Bureau’s website.

https://www.toshiseibi.metro.tokyo.lg.jp/bosai/toshi_saisei/data/press24yoteisyakettei01.pdf

Q7: How were the members of the Selection Committee chosen?

The Selection Committee was established for the purpose of professionally and objectively reviewing matters related to the recruitment of operators and the selection of their proposals.

Selection Committee Members were asked to join as outside experts with specialized knowledge and experience in various fields. Members' fields were based on 9 set areas, all specialized fields necessary for the selection of the Project, including community development, transport, environmental friendliness and landscaping, design, creating vibrancy, culture, legal affairs, finance, and real estate appraisal.

Q8: What is the score distribution for the selection process?

Proposals from applicants were reviewed from three standpoints: the project plan, rent, and an overall evaluation, each receiving a maximum of 80 points, 10 points, and 10 points respectively for a total of 100 points. Within the project plan, “facility/community development plans and technical evaluation” as well as “project operations and management evaluation” were scored up to a maximum of 65 points and 15 points, respectively.

Additionally, proposals that do not meet participation qualifications or eligibility screening for basic matters were disqualified.

Q9: What are the results of the investigation of buried cultural properties?

In preliminary excavations to date, stone revetment for the pond, another stone revetment of the Sumida River that is reckoned to have been constructed in the Edo period, and a wooden water pipe from the same period have been unearthed.

Excavated remains will be handled appropriately in coordination with relevant organizations.

Regarding preliminary excavation for an archeological investigation for buried cultural properties, please refer to the Urban Development Bureau's website for "Guides for Project Applicants".

(https://www.toshiseibi.metro.tokyo.lg.jp/bosai/toshi_saisei/saisei08.html)

Q10: What measures have been taken to deal with soil contamination?

The surveys conducted thus far on the condition of soil contamination showed that there are some spots that exceed the standard values based on the Soil Contamination Countermeasures Law. But there are no ingestion routes for soil contamination found, and no health hazards are expected to occur.

When we conduct land modification in the future, we will consult with the Operator and implement soil contamination countermeasures appropriately in accordance with the Soil Contamination Countermeasures Law and other related regulations.

For the surveys against soil contamination, please check the “Tsukiji Community Development Project” on the Bureau of Urban Development’s website (https://www.toshiseibi.metro.tokyo.lg.jp/bosai/toshi_saisei/saisei08.html).

Q11: What sort of proposals were made by the Prospective Operator? And please tell us the scale of the facilities (the building area, total floor space, etc.) proposed by the Operator?

*For details on the Prospective Operator's proposal summary, please refer to the Bureau of Urban Development's website for "Selection of Prospective Operator"

([https:// www.toshiseibi.metro.tokyo.lg.jp/bosai/toshi_saisei/data/teianegaiyou.pdf](https://www.toshiseibi.metro.tokyo.lg.jp/bosai/toshi_saisei/data/teianegaiyou.pdf))
